

Publishing Options for the Classroom Owner's Manual

Using the [Comic Creator](#), students draw an activity or place in the classroom. Use conversation bubbles for the text.

The [Flip Book Tool](#) can be used by a group of students. Since students can add up to ten pages, groups can work together to write and draw about all of the learning centers, or describe each of the classroom jobs.

Using the [Multigenre Mapper](#), students can draw a picture and add up to three boxes of text for their section of the classroom owner's manual.

The [Letter Generator](#) can be used to type of the descriptions of the classroom, and addressed to "Classroom Visitors."

Using the [Stapleless Book](#), several students can work together to create up to eight pages of their owner's manual.

The [ReadWriteThink Printing Press](#) provides students with several publishing options. They can create a brochure, a flyer, a newsletter, or a booklet.
